**NORTHTOWN
PREGNANCY
CENTER**

*If you think you
might be pregnant...*

**Before you make any
decision, stop, take a
breath.**

Let us ask you a few
questions.

- Have you had a medical quality pregnancy test?
- Have you had an ultrasound?
- Have you been tested for chlamydia or gonorrhea?
- Have you talked through *all* your options?
- Have you just sat and talked with someone who will listen to your concerns?

**If you have answered
no or not sure to any
of these questions
you need our
services. There is
no cost to you for
our services and
they are completely
confidential.**

Pregnancy Services

Our pregnancy tests are lab quality and used in doctor's offices.

We can do a limited obstetric ultrasound. You need to know that your pregnancy is viable, what the gestational age is and that the baby is in the uterus. Our ultrasound can answer these questions.

Talking through your options will help you make an educated decision.

Additional Services

- Testing for Chlamydia and Gonorrhea
- Medical Referrals
- Community Referrals
- Abortion Recovery Group
- Parenting Classes

**All services are
offered free of
charge.**
